

FRONIUS USA CORONAVIRUS IMPACTS

THE UPDATES:

At Fronius our thoughts are with those who have been affected by the global pandemic caused by the spread of the coronavirus (COVID-19).

As the crisis continues to develop, we, at Fronius, are monitoring the [World Health Organization \(WHO\)](#), the [Centers for Disease Control and Prevention \(CDC\)](#) as well as local health and government advisories closely. As a result we have put a COVID-19 Emergency Action Plan in place. This action plan is designed to minimize the risks for our team members, our customers, and the communities around us; especially in regards to the elderly and chronically ill.

At this point, those in our company that are able to work from home are doing so. This is to limit general exposure and to enable social distancing. Thus, our headquarters including warehouse, order fulfillment, and repair center are operating normally. We don't expect the current level of remote work to impact the experience of our customers materially; however, we do appreciate your patience and understanding at this time.

Global supply chains are under pressure with the situation changing on a daily basis. While we are currently able to manage the demand for the majority of our customers, we are also preparing for potential disruptions in the coming days and weeks.

Our goal is to minimize the impacts on your business as much as possible, while being a responsible and action oriented organization. If the situation changes, we will pro-actively communicate any changes to you.

If you have any questions related to the current situation, please contact us.

Thank you for your continued trust and confidence in Fronius.
